

Have you tested your home for **radon** in the past two years?

The bad news...

- ▶ Radon gas has no smell, taste, or color, yet it is the **most common cause of lung cancer** in people who have never smoked.
- ▶ **Seven out of ten Iowa homes** have elevated radon levels!
- ▶ There is **no safe level** of radon.

The GOOD news...

- ▶ Radon testing is **easy** and can be **very inexpensive**.
- ▶ If high radon levels are found, they can be reduced.

Talk to your doctor about how to protect yourself and your family.
